# Why You Need a Cloud Solutions Provider for Your Business

MOVE TO THE CLOUD

## WHY YOU NEED A CLOUD SOLUTIONS PROVIDER FOR YOUR BUSINESS

Information is the heart of all modern organisations. How you collect, access, process, and secure your business information is crucial in the digital economy. An experienced Cloud Solutions Provider (CSP) ensures that your business is not susceptible to security threats, data loss and costly downtimes. Using a CSP extends your business capabilities beyond the usual in-house IT operations. Enjoy the stability and reliability of an effectively monitored and managed cloud environment that eliminates interruptions to your business.

### THE BENEFITS OF USING A CLOUD SOLUTIONS PROVIDER

#### THE COST IMPLICATIONS OF USING A CSP

On-premise network maintenance costs take a huge bite out of your pocket. Cloud solutions offer the flexibility of paying for what you need, and scaling as your business grows. Unlike legacy IT systems that attract huge CapEx due to annual upgrades, Cloud solutions offer predictable and more consistent monthly billing that is customised to fit your requirements and budget. It allows you to easily manage your costs and allocate the saved funds on growing your business.

#### ALWAYS-ON AND FUTURE-READY

Moving to a cloud solution does not mean you need to overhaul your business processes. Cloud solutions supplement and streamline your business practices and policies for increased productivity and efficiency. Adapting to the ever-evolving technology requirements is simplified in the Cloud. No more high investments in IT infrastructure that proves to be obsolete over time. Stay ahead of advancements with simplified upgrades and updates. Tarsus on Demand ensures that you always have the latest version of the software, keeping you ahead of the curve so you can focus on working on your business.

#### FAST RESPONSE TIMES AND RESOLUTIONS

Supercharge the productivity of your workforce with a Cloud network that is always available. No inconveniences due to unexpected downtime. Service continuity is one of the key benefits of using a Cloud Solution. At Tarsus on Demand, we pride ourselves on being highly responsive and resolving any challenges with urgency, giving you peace of mind. Enjoy fast response times with enterprise-level monitoring.

## WHY CHOOSE MICROSOFT 365

Microsoft 365 is a best-of-breed enterprise Cloud productivity suite. It offers an array of tools, applications, and features designed to enhance your staff's ability to work, collaborate and communicate. We're all familiar with the standard Microsoft Word, Excel, PowerPoint and Outlook tools that we use daily. However, Microsoft 365 extends the capabilities of your business with tools such as Exchange Online that gives employees centralised access to emails, calendars, tasks and contacts.

Furthermore, SharePoint empowers your staff through online storage, enabling collaboration. Say goodbye to the days when team members lose documents on the server when they forget to click "Save as" and save over other documents and lose critical information that may cause unnecessary delays.

Communication tools such as Teams facilitate instant messaging and quicker virtual conferencing. Teams also acts as a collaboration tool with file sharing, channels to communicate to specific team members, calendaring and calling. Business leaders enjoy a secure management interface with two-factor authentication for simplified enforcement of compliance policies.

## WHAT DOES THIS MEAN FOR MY BUSINESS?

### FLEXIBILITY

Link to the power of reliable cloud infrastructure and free yourself from the need for local servers and bulky legacy systems. Shed the load off your hardware requirements and focus more on strategic tasks while reducing the day-to-day costs associated with mobility, technology, energy, personnel and compliance. Instead of worrying about the CapEx implications of upgrading hardware, with Cloud, you will always have the latest version of the tools.

### REMOTE WORKING

Working from home doesn't always mean you're working at home. Boost productivity by removing the bottlenecks that prevent staff from accessing documents remotely. The Microsoft 365 Cloud solution offers the tools for employees to stay productive even when they are working remotely.

## WHY CHOOSE MICROSOFT 365

### COLLABORATION

With the old way of doing business, your staff would all work on their sections of documents and consolidate afterwards. Take collaboration to the next level with the ability for your entire team to work on the same live document. SharePoint enables information to flow seamlessly throughout your business and is a central point of storage for all documentation. Staff can easily share links to documents and work simultaneously with others.

### SECURITY

Leverage the watertight security from the tech mammoth that is Microsoft. Unlike legacy on-premise server security that stretches as far as your budget, leaving you vulnerable or with a high IT bill. Migrate to Cloud and enjoy world-class security and multi-factor authentication that provides a secondary level of authentication for maximum protection.

### ELIMINATE BUSINESS INTERRUPTIONS

With an always-on cloud solution, you can reduce the cost of unexpected business interruptions. Business continuity comes as a standard benefit of a reliable solution that ensures that you and your staff can conduct business anywhere, any time, using any device. All you need is an internet connection. Enjoy the flexibility of having the apps on the cloud and locally on your desktop. You can save files offline directly onto One Drive and your changes will be auto-uploaded when connectivity to the internet is restored.

Furthermore, you do not have to overhaul your business processes or train your staff to use an entirely new system. Most employees are competent in using Microsoft tools. All additional capabilities have a shallow learning curve, so you will be ready to hit the ground running.

## WHY TARSUS ON DEMAND AS YOUR CLOUD SOLUTIONS PROVIDER OF CHOICE

Choose Tarsus on Demand as your partner so that you don't have to waste time working in your business, but rather focusing on working on your business instead. Your employees need the right tools and applications to keep your business operational, whether they are working from the office or at home. With Microsoft 365 and the right partner to migrate and support your solution, your team will be equipped with the tools to drive your business forward.

Tarsus on Demand removes the headache and hassle, making your migration to the cloud pain-free and seamless with three easy steps. We assess, feedback and migrate. But, what does this mean. We assess your business to ensure we provide a solution that is tailored to your unique business requirements. Secondly, we provide feedback and recommendations based on what you need. Lastly, we offer a smooth transition from your current system to the cloud with no interruptions to your business operations.

Let us help you future-proof your business, today. With 3 Simple steps to your migration to the cloud:

Assess » Feedback » Migrate
